

DAMKO

Solid Fuel Stove

Hard anodized aluminum solid fuel compact stove

The DAMKO Solid Fuel Emergency/Backpack Stove features a unique Twist Lock design for easy assembly. Boasting impressive performance for its compact size, this stove is collapsible down to less than 1.5-inches tall, a weight of only 6.2 ounces you can pack it everywhere. A hard anodized 6061 aluminum design makes this stove extremely durable. Its lightweight portable design you can throw it into your car, ATV, backpack or bug out bag as an ideal survival stove.

Engineered to burn solid fuel tablets at the optimal distance from the base, water can be boiled much more efficiency than with traditional designs. A single 14g fuel tablet can boil a pint of water in approximately 8 minutes*. The three leg design ensures stability on uneven surfaces while optimizing air flow for burn efficiency - even in windy conditions. A superior quality machined design made right here in the USA.

- **HEIGHT ASSEMBLED** - 2.7 inches
- **HEIGHT UNASSEMBLED** - 1.5 inches
