## NEW MARTINI RIFLE PRODUCTION

*DAMKO to Begin Production of the New Modern Martini Rifle*

DAMKO is excited to announce production of the new Modern Martini Rifle at our White City, Oregon facility. The manufacturing of a new style Martini-Henry rifle with modern safety features represents a much needed addition to the single-shot rifle community.

The highly anticipated DAMKO Modern Martini Rifle features a trigger lock safety and independent sear. Improvements include a quick disassembly latch for removal of the entire action in seconds, as well as increased block support.

Initial production runs will begin with chambering in 25-35 Win, 30-30 Win, 30-40 Krag, .303 British, .357 Magnum, and .44 Remington Magnum. Barrels will be available 20" or 24" lengths with flat-top, peep, and scope mount sights. DAMKO also offers a complete Custom Shop option for chambering, barrel length, furniture, and finish.

These rifles are an all American product; designed, engineered and produced right here in the USA. Individually hand-crafted with real walnut furniture and hand finished to ensure the finest quality.

DAMKO Modern Martini Rifles will have a starting MSRP of \$1799.00
